Overview

Altimeter satellite gridded Sea Level Anomalies (SLA) computed with respect to a twenty-year [1993, 2012] mean. The SLA is estimated by Optimal Interpolation, merging the L3 along-track measurement from the different altimeter missions available. Part of the processing is fitted to the Global ocean. (see QUID document or http://duacs.cls.fr pages for processing details). The product gives additional variables (i.e. Absolute Dynamic Topography and geostrophic currents (absolute and anomalies)). It serves in delayed-time applications. This product is processed by the DUACS multimission altimeter data processing system.

Classification

Full name	Global Ocean Gridded L 4 Sea Surface Heights And Derived Variables Reprocessed 1993 Ongoing
Product ID	SEALEVEL_GLO_PHY_L4_MY_008_047
Source	Satellite observations
Spatial extent	Global Ocean · Arctic Ocean · Lat -89.94° to 89.94° · Lon -179.94° to 179.94°
Spatial resolution	0.125° × 0.125°
Temporal extent	1 Jan 1993 to 16 Jan 2026
Temporal resolution	Daily
Processing level	Level 4
Variables	Sea surface height above geoid · Sea surface height above sea level · Surface geostrophic eastward sea water velocity · Surface geostrophic eastward sea water velocity assuming sea level for geoid · Surface geostrophic northward sea water velocity · Surface geostrophic northward sea water velocity assuming sea level for geoid
Feature type	Grid
Blue markets	Policy & Governance · Science & Innovation · Extremes & Hazards & Safety · Coastal Services · Natural Resources & Energy · Trade & Marine Navigation
Projection	Rectangular
Update frequency	Several-time-yearly
Format	NetCDF-4
Originating centre	CLS (France)
Last metadata update	26 November 2024

Copernicus

The Copernicus Programme is the European Union's Earth Observation Programme, looking at our planet and its environment for the ultimate benefit of all European and global citizens.

Copernicus Marine Service

Provides free, open, regular and systematic reference information on the blue (physical), white (sea ice), and green (biogeochemical) ocean state, variability and dynamics across the global ocean and European regional seas.
